OVAL TEPPANYAKI CASES SHOW

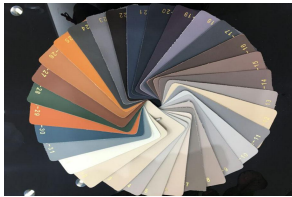

OVAL TEPPANYAKI MANUFACTURE DESIGN

12 SEATED OVAL JAPANESE TEPPANYAKI TABLE

OVAL TEPPANYAKI PRODUCT IN DETAILS

Key Parts	Image Show	Description
Cooking Area		2400*850*800 mm cooking area 22-25mm thickness high quality stainless steel & low carbon alloy steel High temperature resistance, non-stick, anti-corrosion, anti-rust, no deformation, no discoloration
Teppanyaki Dimension	without marble counter top	2400*850*800 mm
	with marble counter top	3400*1350*800 mm
Teppanyaki Weight	without marble counter top	600KG
	with marble counter top	910 KG
Heat Mode		gas
Intelligent Control Panel		easy to control fire degree and air volume
Built-in Downdraft System		American Ventilation Aperture*1 Baffle Filter *2 Built in Fan motor*1 Air volume per hour: 2,500 m ³ ; Low noise (40-50 db only); can support extraction of a straight duct within 5m Built in Purifier *1 1) Taiwan SUPAR brand ; 2) To remove the fume factors larger than φ0.1μm with efficiency of 93-97.2%; 3) High and low voltage dust collecting plate separation technology, easy for cleaning;

Marble Counter Top	 	DuPont marble, 1.8 mm thickness, over 20 types for choosing. Optional
Chairs with Genuine Leather	 	soft genuine leather surface and cushion, plus genuine wood chair base, over 30 colors options, you can choose the best combination of marble countertop and chair. Optional

ITEM#	PICTURE	DESCRIPTION	QTY	Measure Unit	UNIT PRICE (USD)	Measure Unit	SUB TOTAL (USD)
Option A Hood on Ceiling Type (updraft)		high quality stainless steel & low carbon alloy steel Model: CT-10 Heating Mode: gas fired Dim: 2400*850*800 mm (L*W*H) Cooking Plate Thickness: 22-25mm table with updraft system	1	SETS		SETS	
Option B Duct on Floor Type (downdraft)		high quality stainless steel & low carbon alloy steel Model: CT-10 Heating Mode: gas fired Dim: 2400*850*800 mm (L*W*H) Cooking Plate Thickness: 22-25mm table with downdraft system	1	SETS		SETS	
Updated Marble Holder		heavy duty cast iron made for easily marble assemble	1	SETS		SETS	
Chef Tools Kit		SUS 304 Made 1* 2 LINE FORK & KNIFE 1*DOMED BASTING COVER 1* GRILL SPATULA	1	SETS		SETS	
Freight Charge	CIF Suva Port from Shanghai factory, in plywood veneer package		1	BILLS		BILLS

- PRODUCT DETAILS ADD UP**
- Cooking Plate Material: food grade alloy steel, 18-22 mm thick, No deformation. No discoloration.
 - The operation panel, the oil collection drawer, the oil filter plate, etc. are all made of 1.0mm stainless steel, and the suction port is made of 1.5mm mirror stainless steel;
 - Chef standing face baffle: 1.0mm 304# stainless steel plate
 - Frame: 40*40*2.5mm tubing
 - Teppanyaki customized built-in fan: exhaustive wind, low noise (380V/0.25KW)
 - High-voltage dissolved Purifier (97% processed): CE certification, (220V/0.25KW) (Imported product)
 - Electrothermal Heating: heated by electric heating tube, 380V/8KW, Advantages are:
 - Made of imported 304# stainless steel, high thermal efficiency, good mechanical strength and good adaptability under bad work.
 - The interior adopts a customized triple insulator, close to cooktop, low heat loss and better moisture resistance than similar products on the market. It is safe and reliable to use.
 - Resistance of fouling and corrosion, innovative design, convenient for later cleaning and maintenance.
 - Evenly heat, heating takes about 20 minutes, easy to operate, no visual flame, temperature difference is $\pm 20^{\circ}\text{C}$ (68°F)
 - Electromagnetic Heating: heated by electric magnet disc, 380V/8KW. Advantages are:
 - Adopting German imported core technology in research and development;
 - The main heating area can be increased according to the size of the device, and according to the coupling effect, the heat loss is small, evenly heat and high thermal efficiency.
 - Electromagnetic radiation is only 18K-35K, European national standard is below 100K
 - Fast heating speed, high temperature control, strong temperature control, environmental protection and energy saving, temperature difference is $\pm 1^{\circ}\text{C}$, easy to operate
 - Built in leakage protection and overload protection devices
 - Gas Fired: Double-ring double-fire burner, liquefied gas: 0.89 kg / hour, natural gas: 1.2 cubic / hour
 - Accessories: stainless steel exhaust hood, oil net, oil pocket, 1/9 pot, gravity foot, universal wheels
 - Single unit air volume 2500 cubic meters / hour

Bilateral Agreements

- If one party unilaterally defaults, the defaulting party must pay 30% of the total contract price as liquidated damages.
- After the delivery period expires, if Party A does not pick up the goods temporarily, Party B will provide one month of free storage after all money paid. The storage fee will be charged at 1 USD/square/day for more than one-month storage. If over one year, the equipment will return to Party B and the payment will not be returned to Party A.

PAYMENT INFO: PLEASE CONFIRM BEFORE ANY DEPOSIT !

- NOTES OR SPECIAL COMMENTS**
- Production period: 15 working days after 50% deposit, the rest will be paid before shipping.
 - Package weight: 600 kg/Volume: 2.6 m³ PER SET.
 - Price Term: CIF Suva Port from Shanghai factory, in plywood veneer package
 - Warranty: ONE YEAR after leave factory.

We will be happy to supply any further information you may need and trust that you call on us to fill your order, which will receive our prompt and careful attention.
